Focus on apps and web services development

Our team of 60 members is located in St Petersburg (Russia)

We are the experts in mobile apps development, frontend, backend and web development, and QA

Product research conduction

The product hypotheses construction is based on the analysis of business goals, market, and target audience

UI design development

We develop the interface design for complex projects according to the business objectives
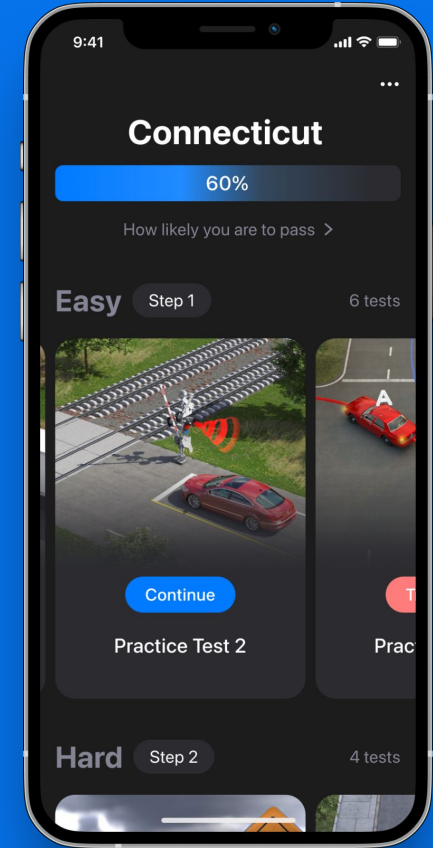

Digital business solutions

We have enabled millions of people worldwide to prepare for exams with DMV Genie

14 applications to help people learn new skills are supported and updated by our team. We have been working on the DMV Genie group projects for 4 years already. As a result - 6.5 million downloads, 400,000 monthly active users, and a score of 4.8.

Restart of mobile banking for Tele2 subscribers

We were responsible for redesign and restart of the service. Our team also coordinated the work of six participants of the project. The application is based on a microservice architecture.

New birth of RBC Investment

We have developed the app to help people to invest. Custom elements, smooth active graphs and seamless animation are killer features of the case.

NeoBank: development and launch

We helped to launch a new top-of-the-line service. Neobank is simple outside, but complex inside with its two-factor authentication, QR codes generation and the ability to send cryptocurrency by phone number.

We joined the Pomosch project team

We're working on the first mobile app to provide a targeted and transparent social support in Russia. The project lives off volunteers assistance. We joined the team and helped to make everything better.
